PROGRESS IN

NEUROBIOLOGY

An International Review Journal

Editors

G. A. Kerkut

Department of Physiology and Biochemistry, University of Southampton, England

J. W. Phillis

Department of Physiology, Wayne State University, U.S.A.

Subscription

Progress in Neurobiology is published as 12 issues per year.

Single parts are available. Subscription enquiries from customers in North America should be sent to: Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, U.S.A., and for the remainder of the world to: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, U.K.

Microform Subscriptions and Back Issues

Back issues of all previously published volumes are available direct from Pergamon Press. Back issues of Pergamon journals in microform can be obtained from UMI, 300 North Zeeb Road, Ann Arbor, Michigan, 48106, U.S.A.

CONTENTS

PHYSIOLOGICAL PLASTICITY IN AUDITORY CORTEX: RAPID INDUCTION BY LEARNING 1
NORMAN M. WEINBERGER and DAVID M. DIAMOND, Center for the Neurobiology of Learning and Memory, and Department of Psychobiology, University of California, Irvine, Irvine, CA 92717, U.S.A.

DIRECTIONS IN NEUROGENETIC GRADIENTS AND PATTERNS OF ANATOMICAL CONNECTIONS IN THE TELENCEPHALON 57
SHIRLEY A. BAYER* and JOSEPH ALTMAN†, *Department of Biology, Indiana-Purdue University, Indianapolis, Indiana 46223, U.S.A. and †Department of Biological Sciences, Purdue University, West Lafayette, Indiana 47907, U.S.A.

THE INTERSTITIAL NUCLEUS OF CAJAL AND ITS ROLE IN THE CONTROL OF MOVEMENTS OF HEAD AND EYES 107
K. FUKUSHIMA, Department of Physiology, Hokkaido University School of Medicine, Sapporo 060, Japan

NEUROTOXICANT SENSITIVE ESTERASE. ENZYMOLOGY AND PATHOPHYSIOLOGY OF ORGANOPHOSPHORUS ESTER-INDUCED DELAYED NEUROPATHY 193
RONALD ZECH* and JÖRG M. CHEMNITIUS†, *Abteilung Enzymchemie, Institut für Biochemie, Humboldtallee 23, 3400 Göttingen, F.R.G. and †Abteilung Kardiologie und Pulmonologie, Zentrum Innere Medizin, Fachbereich Medizin, Universität Göttingen, F.R.G.

CIRCADIAN RHYTHMS IN MAMMALIAN NEUROTRANSMITTER RECEPTORS 219
ANNA WIRZ-JUSTICE, Psychiatric University Clinic, Basel, Switzerland

WHY ARE SO MANY BIOLOGICAL SYSTEMS PERIODIC? 261
P. E. RAPP, Department of Physiology and Biochemistry, The Medical College of Pennsylvania, 3300 Henry Avenue, Philadelphia, PA 19129, U.S.A.

MEMBRANE AND SYNAPTIC PROPERTIES OF IDENTIFIED NEURONS IN THE OLFACTORY BULB 275
KENSAKU MORI, Department of Physiology, Gunma University School of Medicine, Maebashi, Gunma 371, Japan

CALMODULIN AND ITS ROLE IN INTRACELLULAR CALCIUM REGULATION 321
JEAN-CLAUDE STOCLET,* DOMINIQUE GERARD,† MARIE-CLAUDE KILHOFFER,† CLAIRE LUGNIER,* ROBERT MILLER* and PAUL SCHAEFFER*, Laboratoire de Pharmacodynamie* (CNRS UA 600) et de Physique †(CNRS UA 491), Faculté de Pharmacie, Université Louis Pasteur, F 67048 Strasbourg Cedex, France

ATTENTION DEFICIT DISORDER WITH HYPERACTIVITY (ADDH): THE CONTRIBUTION OF CATECHOLAMINERGIC ACTIVITY 365
ROBERT D. OADES, Department of Physiology, Flinders University Medical Centre, Bedford Park, SA 5042, Australia

MORPHOLOGICAL CHANGES OF DORSAL ROOT GANGLION CELLS IN THE PROCESS-FORMING PERIOD 393
KYOZO TAKAHASHI and TAKAFUMI NINOMIYA, Department of Anatomy, Sapporo Medical College, Sapporo, Japan

INDEX

Accessory olfactory bulb 306
Acetylcholinesterase, organophosphorus toxicity 209
Acoustic stimulation, habituation 22
Adaption, learning-induced cortical plasticity 40
Adenosine-3′,5′-monophosphate
  circadian rhythms in production 244
  effect of calmodulin on metabolism 349
  role in sodium–calcium exchange 344
Ca^{2+}-Adenosine triphosphatase
  plasma membrane 324, 344
  sarcoplasmic reticulum 347
Adenylate cyclase
  brain circadian rhythms 244
  regulation by calmodulin 349
α_1-Adrenergic receptors, brain circadian rhythms 229, 230, 247
α_2-Adrenergic receptors
  brain circadian rhythms 232, 235
  stimulated feeding, circadian rhythms 246
β-Adrenergic receptors
  brain circadian rhythms 229, 230, 233, 234, 239, 247, 251, 254
  pineal gland circadian rhythms 223
Age, circadian rhythms in receptor binding 240
Amoebae, periodic behaviour 267
Amphetamine, treatment of attention deficit disorder with hyperactivity 367
Amygdala, neurogenetic gradients 73
Antidepressant drugs, effect on circadian receptor rhythms 248
Associatively-induced plasticity in auditory cortex 27, 29, 33
Attention deficit disorder with hyperactivity 365–391
  animal model, spontaneous hypertension 379
  behavioural indices of cognition 371
  catecholamines 367
  comparison with other disorders of catecholamine disfunction 374
  electrophysiological indices of cognition 370
  parallels to experimental animal studies 376
  psychostimulant treatment 367
Auditory cortex, physiological plasticity and learning 21, 44
  adaptive functions 40
  associatively-induced plasticity 27, 29, 33
  habituation 23
  implications 38
  pupillary conditioning 6
Auditory system, organization 10
Axonal projections, development 96

Blood pressure, role of dopamine 380
Bromocriptine, ADDH treatment 374

Calciproteins 322
Calcisomes 334
Calcium, regulation in eukaryotic cells 321, 323
  calmodulin interaction 323, 328
  calmodulin and transporting systems 324, 342
Calcium–sodium exchange 344
Calmidazolium 335
Calmodulin
  calcium binding sites 328
  calcium-induced conformational changes 329
  effect on calcium transporting systems 343
  effect on cyclic nucleotide metabolism 349
  inhibitors 335
  interactions with enzymes and other proteins 330
  intracellular location and regulation in eukaryotic cells 340
  structure 325
Calmodulin inhibitors
  binding sites 337
  mechanisms of inhibition of target enzyme activation 338
  structure 335
  tools for studying intracellular functions of calmodulin 339
CAPP-calmodulin 338, 340
Carboxylesterases
  in brain 205
  organophosphorus ester-induced delayed neuropathy 208
Catecholamines
  attention deficit disorder with hyperactivity 367, 373
  circadian rhythms 251
  Lesch–Nyhan syndrome 375
  phenylketonuria 374
  Tourette's syndrome 375
Caudoputamen complex, neurogenetic gradients 77
Centrifugal fibres, synaptic inputs from 302
Cerebellar nuclei, inputs to interstitial nucleus of Cajal 148
Cerebellum, β-adrenergic receptor binding, circadian rhythms 239
Cervical muscles 183
Cholinesterases, organophosphorus ester-induced delayed neuropathy 208
Circannual rhythms 263
Circadian rhythms, entrainment 265
Circadian rhythms, mammalian neurotransmitter receptors 219–259
  α_1-adrenergic stimulated behaviours 247
  α_2-adrenergic stimulated feeding 246
  β-adrenergic receptor in pineal gland 223
  β-adrenergic stimulated behaviours 247
  age and gender 240
  antidepressant drugs 248
  CNS regional differences 229
  hormone receptors 253
  human 252
  methodology 221
  opiate receptors and pain sensitivity 245
  rapid receptor change mechanism 254
  receptor binding 223
  receptor rhythms 241, 245
  retinal input 248
  seasonal modulation 246
  serotonin receptor stimulation and behavioural response 246
  strain differences 238
Classical conditioning 5
Clonidine, binding in brain, circadian rhythms 237, 238
Cognition, ADDH children 370, 371
Commissural/associational afferents, neurogenesis 65

Compound 48/80, calmodulin inhibition 335, 339
Conditioned stimulus/response 5
Continuous performance task, ADDH children 371
Cyclic nucleotides, effect of calmodulin on metabolism 349

Development, neurogenetic gradients and anatomical connections in telencephalon 57–106
Diazepam, binding in brain, circadian rhythm 225, 229
Dihydroalprenolol, binding in brain, circadian rhythm 225, 229, 230, 233, 234, 239
Diphenylalkylamines, calmodulin inhibitors 335
L-DOPA, effect on ADDH children 373
Dopamine
  attention deficit disorder with hyperactivity 367, 373, 376
  attention-related symptoms in animals 376
  contribution to hypertension 380
  Lesch–Nyhan syndrome 375
  Tourette's syndrome 375
Dopamine neurons in striatum, neurogenesis 79
Dorsal root ganglion cells, process formation 393–410

Efficiency, periodic control 267
β-Endorphin, calmodulin inhibition 337
Entorhinal cortex, rhinal to dentate neurogenetic gradient 65, 67
Entrainment 264
Ergolines, ADDH treatment 374
Eukaryotic cells, calcium regulation 321
Event-related potentials, ADDH children 370
Extraocular motoneurons, interstitial nucleus of Cajal outputs to 122
Eye, role of interstitial nucleus of Cajal in movements 125, 144, 153, 157, 168

Fastigial nucleus 148
Feeding, α_2-adrenergic receptor stimulated circadian rhythms 242, 246
Felodipine, calmodulin inhibition 335, 337, 342
Frequency encoding of information, periodic behaviour 267
Frequency receptive fields, learning-induced changes 35
Frequency specific habituation in auditory cortex 23
Frontal cortex
  circadian rhythms in receptor binding 229
  inputs to interstitial nucleus of Cajal 144

Gender, circadian rhythms in receptor binding 240
Ginger-paralysis 193
Glutamate, contribution to hypertension 380
Glycolysis, periodic behaviour 262, 267
Granule cells, olfactory bulb 281
  dendrodendritic synaptic interactions in external plexiform layer 302
  membrane properties 300
  morphological characteristics 299
  synaptic inputs from centrifugal fibres 302
Guanosine-3′,5′-monophosphate, effect of calmodulin on metabolism 349

Habituation, acoustic stimulation 3, 22
Head posture and movement, role of interstitial nucleus of Cajal 162, 177
Hippocampal–septal system, neurogenesis 62
Homovanillic acid, excretion in ADDH children 368
Hormone receptor rhythms 253
5-Hydroxytryptamine
  behavioural rhythms 246
  contribution to hypertension 380
  role in ADDH 369
Hyperactive child syndrome 356
Hyperactivity, experimental animal studies 377
Hypothalamus, circadian rhythms in receptor binding 233, 242

Imipramine, effect on receptor rhythms 250
Inferior olive, interstitial nucleus of Cajal outputs to 137
Interpositus neurons 151
Interstitial nucleus of Cajal, role in control of head and eye movements 107–192
  inputs to 139
  morphology 109
  motor deficits following lesions 157
  outputs 110
  signals carried by neurons 153
  structural–functional correlations 168
Interstitiospinal neurons
  action on spinal motoneurons 118
  properties 110

Learning, physiological plasticity in auditory cortex 4, 5, 44
  adaptive functions 40
  associatively induced 27, 33
  habituation 23
  implications 38
  induced changes in evoked activity 34
  medial geniculate nucleus 15
Lemniscal line 12
Lesch–Nyhan syndrome 375
Lithium, effect on receptor rhythms 248
Locus coeruleus, circadian rhythms 232
Long term potentiation in magnocellular medial geniculate nucleus 18

Magnocellular basal nuclei, neurogenetic gradients 85
Matching of familiar figures test, ADDH children 371
Medial geniculate nucleus 13
  adaptive functions 41
  long term potentiation 18
  physiological plasticity 15
Methylhydroxyphenylethylene glycol, excretion in ADDH children 368
Methylphenidate, treatment of ADDH 367, 371
Mipafox 195, 203, 205
Mitral cells 279
  dendrodendritic synaptic interactions in external plexiform layer 290
  membrane properties 283
  morphological characteristics 281, 309
  neuroepithelium 88
  response to odor stimulation 294

synaptic inputs 287, 311
synaptic interactions in glomerulus 288, 311
synaptic outputs 292
Monoamine oxidase, role in ADDH therapy 373
Muscarinic cholinergic receptors in brain, circadian rhythms 225, 226, 228, 251

Naloxone, binding in brain, circadian rhythms 225
Neck rigidity 167, 177
Neostriatum, neurogenetic gradients 78
Neuroepithelium
cell lines in 87
neurogenetic hypothesis 94
Neurogenetic gradients, telencephalon 58
hippocampal–septal system 62
mechanisms of temporal ordering of anatomical connections 86
olfactory system 68
striatopallidal system 77
thymidine autoradiography 59
Neuropeptide Y, contribution to hypertension 380
Neuroplasticity, auditory system 3, 15, 21
adaptive functions 40
implications 38
learning 5, 44
medial geniculate nucleus 15
Neurotoxicant sensitive esterase 199
differential test 202
inhibition kinetics 205
molecular properties 207
structure–inhibitor analogies 202
Neurotransmitter receptors, circadian rhythms 219–259
Noradrenaline
circadian rhythms 242
contribution to hypertension 379
role in ADDH 367
Nucleus accumbens, neurogenesis 62, 80

Oculomotor neurons 125
Odor, response of olfactory bulb cells 294, 306
Olfactory bulb, membrane and synaptic properties of neurons 275–320
accessory bulb 306
anatomical organisation 279, 306
granule cells 299
main bulb 279
mitral cells 281, 309
periglomerular cells and short-axon cells 304
tufted cells 294, 309
Olfactory nerve fibres, synaptic inputs to mitral cells 287
Olfactory receptor cells 306
Olfactory system, neurogenetic gradients 68
Olfactory tubercal, neurogenetic gradients 81
Opiate receptors, circadian rhythms 245–247, 253
Organophosphorus compounds
neurotoxic risks 209
species differences in toxicity and metabolism 199
target enzymes 200
toxicity 198
Organophosphorus ester-induced delayed neuropathy
case reports 193
neurotoxicant sensitive esterase concept 202
pathophysiology 208
symptomology 195
target enzymes 200
toxicity of organophosphorus compounds 197
Oscillations 220, 261

Pain, circadian rhythms 245
Pallidum, neurogenetic gradients 84
Paraoxon, inhibition of brain carboxylesterases 205
Pargyline, ADDH treatment 373
Perception 41
Periglomerular cells, olfactory bulb 281, 304
Periodicity 220, 261–273
Peristalsis 265
Phenothiazines, calmodulin inhibition 335, 339
Phenylketonuria 374
Phospholamban, phosphorylation 348
Phosphorylase b kinase, interaction with calmodulin 333
Pineal gland, β-adrenergic receptor, circadian rhythms 223
Plasticity, auditory system 3, 15, 21, 33
adaptive functions 40
implications 38
learning 5, 44
medial geniculate nucleus 15
Prediction, oscillation 266
Pretectal inputs to interstitial nucleus of Cajal 147
Progressive supranuclear palsy 167, 183
Protein kinase C, phospholamban phosphorylation 348
Protein phosphatases, calcium–calmodulin stimulated 351
Psychostimulants, ADDH treatment 367, 371
Pupillary conditioning 6, 34

Quinuclidinylbenzilate, binding in brain, circadian rhythm 225, 226, 228, 230, 231, 233

Receptor rhythms 219–259
Reticular neuroepithelium 88
Retina, input to circadian system 248, 252
Rhinal to gentate neurogenetic gradient 65

Saccadic signal 173
Sandwich gradient, neurogenesis in hippocampus 64
Seasonal modulation of receptor binding rhythms 226
Selective attention 42
Sensitization 7
Sensory cortical function, implications of physiological plasticity 39
Sensory cortex, plasticity and adaptive functions 41
Septal region, neurogenesis 62
Septum, role in hypertension 382
Serotonergic receptors, circadian rhythms 243, 246
Short-axon cells, olfactory bulb 281, 304
Sodium–calcium exchange 344
Spatial organization 265
Spermatogenesis, calmodulin levels 341
Spinal cord, interstitial nucleus of Cajal outputs to 110
Spinal motoneurons, action of interstitiospinal neurons 118
Spinal projecting neurons 117

Spiroperidol, binding in brain, circadian rhythms 225, 231
Spontaneously hypertensive rats
  circadian rhythms 238
  model for ADDH 379
Steele–Richardson–Olszewski syndrome 167
Stimulus analysis 40
Stimulus–response behaviourism 4
Strain differences in receptor rhythms 238
Striatum, neurogenetic gradients 77
Subthalamic neuroepithelium, cell lines in 87
Suprachiasmatic nuclei, circadian rhythms 221, 227
Synaptic properties of olfactory bulb neurons 275–320
Synchronisation 264

Tectal projections to insterstitial nucleus of Cajal 147
Telencephalon, neurogenesis 58
  hippocampal–septal system 62
  mechanisms of temporal ordering of anatomical connections 86
  olfactory system 68
  striatopallidal system 77
  thymidine autoradiography 59
Temporal organisation 264
Thalamic afferents, neurogenesis 67
Thalamocortical auditory system, organisation 100
Thymidine autoradiography, neural development 56, 94
Tourette's syndrome 375
Trichlorfon 195
Tricresylphosphate 193
  metabolite and toxicity 197
Trifluoperazine, cyclic nucleotide phosphodiesterase activation 340
Trochlear motoneurons 125
Troponin C 322, 327
Troponin I 333
Tufted cells, olfactory bulb 279
  morphological characteristics 294, 309
  synaptic inputs from vomeronasal nerves 311
  synaptic interactions in external plexiform layer 298, 311
  synaptic organisation in glomerulus 297
  synaptic outputs 298
Tyrosine, effect on ADDH children 373

Ultradian rhythms 222, 228

Vasoactive intestinal polypeptide, calmodulin inhibition 336, 340
Ventral ectosylvian auditory fields 12, 29
Vestibular nuclei
  inputs to inferior nucleus of Cajal 139
  interstitial nucleus of Cajal and vertical eye movement 168
  outputs to interstitial nucleus of Cajal 125
Vestibuloocular reflex 153, 158, 171
Vomeronasal nerve 309, 311

W-7, calmodulin inhibition 336, 342
WB-4101, binding in brain, circadian rhythms 225, 230, 233

Zeitgebers 220

LIST OF PREVIOUS REVIEW ARTICLES

VOLUME 1

R. PORTER	Functions of the mammalian cerebral cortex in movement
G. J. MOGENSON and Y. H. HUANG	The neurobiology of motivated behavior
K. KRISTENSSON and Y. OLSSON	Diffusion pathways and retrograde axonal transport of protein tracers in peripheral nerves
V. T. WYNN	Absolute pitch in humans, its variations and possible connections with other known rhythmic phenomena
J. M. SNEDDON	Blood platelets as a model for monoamine-containing neurons
G. G. SOMJEN	Electrogenesis of sustained potentials
D. M. GUTHRIE, J. R. BANKS and E. SOMERVILLE	Studies on the neural control of the skating reflex, and the origin of its variations in field population of the hemipterous insect *Gerris*
H. LABORIT	Gamma-hydroxybutyrate, succinic semialdehyde and sleep
J. S. DE BELLEROCHE and H. F. BRADFORD	The synaptosome: an isolated, working neuronal compartment
N. N. OSBORNE	The analysis of amines and amino acids in micro-quantities of tissue

VOLUME 2

J. R. BLOEDEL	Cerebellar afferent systems: a review
P. L. and E. G. MCGEER	Neurotransmitter synthetic enzymes
G. I. DRUMMOND and Y. MA	Metabolism and functions of cyclic AMP in nerve
R. P. PETERSON and Y. P. LOH	The role of macro-molecules in neuronal function in *Aplysia*

J. A. DEUTSCH — The stomach in food satiation and the regulation of appetite
J. L. JOHNSON — The excitant amino acids glutamic and aspartic acid as transmitter candidates in the vertebrate central nervous system
B. CSILLIK and E. KNYIHAR — Biodynamic plasticity in the Rolando substance

J. L. S. Cobb and V. W. Pentreath — Comparison of the morphology of synapses in invertebrate and vertebrate nervous systems: Analysis of the significance of the anatomical differences and interpretation of the morphological specializations

E. M. Landau — Function and structure of the ACh receptor at the muscle end-plate

Volume 11

Y. Kudo — The pharmacology of the amphibian spinal cord

K. Kuba and K. Koketsu — Synaptic events in sympathetic ganglia

E. Heilbronn and T. Bartfai — Muscarinic acetylcholine receptor

H. McIlwain — Synaptic mediators and the structuring of cerebral activity

G. Burnstock — Do some sympathetic neurones synthesize and release both noradrenaline and acetylcholine?

P. Kometiani, Z. Kometiani and D. Mikeladze — 3′, 5′-AMP-dependent protein kinase and membrane ATPases of the nerve cell

K. S. Krishna Murthy — Vertebrate fusimotor neurones and their influences on motor behavior

Translated by R. Werman — Let us build a nervous system (A fragment of an allegedly ancient Hebrew manuscript reputedly found in the Judean desert)

Volume 12

C. D. Barnes and J. C. Schadt — Release of function in the spinal cord

C. H. Hockman, D. Bieger and A. Weerasuriya — Supranuclear pathways of swallowing

S. Redman — Junctional mechanisms at group Ia synapses

A. Routtenberg — Anatomical localization of phosphoprotein and glycoprotein substracts of memory

T. Radojcic and V. W. Pentreath — Invertebrate glia

E. S. Vizi — Presynaptic modulation of neurochemical transmission

G. G. Yarbrough — On the neuropharmacology of thyrotropin releasing hormone (TRH)

Volume 13

P. M. Saltzman and R. H. Roth — Role of impulse flow in the short-term regulation of norepinephrine biosynthesis

P. C. Emson — Peptides as neurotransmitter candidates in the mammalian CNS

A. Nistri and A. Constanti — Pharmacological characterization of different types of GABA and glutamate receptors in vertebrates and invertebrates

M. Israel, Y. Dunant and R. Manaranche — The present status of the vesicular hypothesis

L. Hertz — Functional interactions between neurones and astrocytes I. Turnover and metabolism of putative amino acid transmitters

K. E. Moore and S. M. Wuerthele — Regulation of nigrostriatal and tuberoinfundibular-hypophyseal dopaminergic neurons

W. A. MacKay and J. T. Murphy — Cerebellar modulation of reflex gain

J. O'Keefe — A review of the hippocampal place cells

Volume 14

G. A. Kerkut — Can fibre optic systems drive lower motoneurones?

T. Sato — Recent advances in the physiology of taste cells

G. J. Mogenson, D. L. Jones and C. Y. Yim — From motivation to action: Functional interface between the limbic system and the motor system

C. B. Gundersen — The effects of botulinum toxin on the synthesis, storage and release of acetylcholine

H. Shinozaki — The pharmacology of the excitatory neuromuscular junction in the crayfish

N. McNaughton and S. T. Mason — The neuropsychology and neuropharmacology of the dorsal ascending noradrenergic bundle—A review

A. Dray — The physiology and pharmacology of mammalian basal ganglia

Volume 15

F. A. Henn and S. W. Henn — The psychopharmacology of astroglial cells

D. G. Jones and B. J. Smith — The hippocampus and its response to differential environments

A. J. Wilkins, C. D. Binnie and C. E. Darby — Visually-induced seizures

J. Parnas, L. Gram and H. Flachs — Psychopharmacological aspects of an antiepileptic treatment

J. O. McNamara, M. C. Byrne, R. M. — The kindling model of epilepsy: a review

DASHEIFF and J. G. FITZ — Epithelial conduction: its properties and functions
P. A. V. ANDERSON — Peptide neuroregulators in invertebrates
L. W. HAYNES — The organization of intraspecific agonistic behaviour in the rat
J. M. KOOLHAAS, T. SCHUURMAN and P. R. WIEPKEMA — Catecholamines, acetylcholine and excitability of mechanoreceptors
G. N. AKOEV — The neural regulation of tongue movements

VOLUME 16

M. J. DOUGHTY and S. DRYL — Control of ciliary activity in paramecium: an analysis of chemosensory transduction in a eukaryotic unicellular organism
P. A. M. VAN DONGEN — The central noradrenergic transmission and the locus coeruleus: A review of the data and their implications for neurotransmission and neuromodulation
M. WOLLEMANN — Endogenous opioids and cyclic AMP
J. L.MARTINEZ JR., R. A. JENSEN and J. L. MCGAUGH — Attentuation of experimentally-induced amnesia
J. W. PHILLIS and P. H. WU — The role of adenosine and its nucleotides in central synaptic transmission
H. ASANUMA — Functional role of sensory inputs to the motor cortex
S. T. MASON — Noradrenaline in the brain: progress in theories of behavioural functions

VOLUME 17

G. B. BAKER, R. T. COUTTS and I. L. MARTIN — Analysis of amines in the central nervous system by gas chromatography with electron-capture detection
M. N. GHABRIEL and G. ALLT — Incisures of Schmidt-Lanterman
A. G. BROWN — The spinocervical tract
P. A. M. VAN DONGEN — The human locus coeruleus in neurology and psychiatry
J. W. PHILLIS and P. H. WU — Catecholamines and the sodium pump in excitable cells
E. EIDELBERG — Consequences of spinal cord lesions upon motor function, with special reference to locomotor activity
A. D. GRINNELL and A. A. HERRERA — Specificity and plasticity of neuromuscular connections: long term regulation of motoneuron function

VOLUME 18

K. V. SUDAKOV — Neuronal mechanisms of leading motivation
A. J. ELBERGER — The functional role of the corpus callosum in the developing visual system: A review
C. R. GARDNER and R. J. WALKER — The roles of putative neurotransmitters and neuromodulators in annelids and related invertebrates
W. SCHULTZ — Depletion of dopamine in the striatum as an experimental model of parkinsonism: Direct effects and adaptive mechanisms
G. RONQUIST and A TERÉNT — Cerebrospinal fluid markers of disturbed brain cell metabolism
P. A. KOMETIANI, N. G. ALEKSIDZE and E. E. KLEIN — The neurochemical correlates of memory
F. MATSUMURA and J. MARSHALL CLARK — ATP-Utilizing systems in the squid axons: A review on the biochemical aspects of ion-transport
G. GRÜN — Development dynamics of synapses in the vertebrate retina
J. A. RICHTER and J. R. HOLTMAN, JR — Barbiturates: Their *in vivo* effects and potential biochemical mechanisms

VOLUME 19

F. V. DEFEUDIS — The link between analgesia and cardiovascular function: Roles for GABA and endogenous opioids
R. C. A. FREDERICKSON and L. E. GEARY — Endogenous opioid peptides: Review of physiological, pharmacological and clinical aspects
K.-E. ANDERSSON and C. SJOGREN — Aspects of the physiology and pharmacology of the bladder and urethra
J. M. BIRD — Computerized tomography, atrophy and dementia: A review
R. S. G. JONES — Tryptamine: A neuromodulator or neurotransmitter in mammalian brain?
T. O. NEILD and E. ZFLCER — Noradrenergic neuromuscular transmission with special reference to arterial smooth muscle
R. P. VERTES — Brain stem generation of the hippocampal EEG
B. S. SCOTT — Adult neurons in cell culture: Electrophysiological characterization and use in neurobiological research

P. A. V. ANDERSON and W. E. SCHWAB — Recent advances and model systems in coelenterate neurobiology
S. L. PETERSON and T. E. ALBERTSON — Neurotransmitter and neuromodulator function in the kindled seizure and state
W. COLANGELO and D. G. JONES — The fetal alcohol syndrome: A review and assessment of the syndrome and its neurological sequelae
A. CHAPMAN, P. E. KEANE, B. S. MELDRUM, J. SIMIAND and J. C. VERNIERES — Mechanism of anticonvulsant action of valproate

VOLUME 20

E. E. BITTAR — The barnacle muscle fibre as a model system for the investigation of the ouabain-insensitive sodium efflux and hormonal actions
R. H. R. FISHMAN, J. J. FEIGENBAUM, J. YANAI and H. L. KLAWANS — The relative importance of dopamine and norepinephrine in mediating locomotor activity
J. A. WILSON and C. E. PHILLIPS — Pre-motor non-spiking interneurons
E. KVAMME — Ammonia metabolism in the central nervous system
W. WALZ and L. HERTZ — Functional interactions between neurons and astrocytes. II. Potassium homeostasis at the cellular level
T. M. ITIL — The discovery of antidepressant drugs by computer-analyzed human cerebral bio-electrical potentials (CEEG)
H. MCLENNAN — Receptors for the excitatory amino acids in the mammalian central nervous system
Y. MOCHIZUKI, T. GO, H. OHKUBO and T. MOTOMURA — Development of human brainstem auditory evoked potentials and gender differences from infants to young adults
S. HOMMA — Physiology and pharmacology of putative transmitters in lamprey central nervous system
J. A. DEUTSCH — Dietary control and the stomach

VOLUME 21

G. C. PALMER — Effects of psychoactive drugs on cyclic nucleotides in the central nervous system
J. J. MCARDLE — Molecular aspects of the trophic influence of nerve on muscle
B. S. SCOTT, L. E. BECKER and T. L. PETIT — Neurobiology of Down's syndrome
E. R. JOHN, L. PRICHEP, H. AHN, P. EASTON, J. FRIDMAN and H. KAYE — Neurometric evaluation of cognitive dysfunctions and neurological disorders in children
S. BRIMIJOIN — Molecular forms of acetylcholinesterase in brain, nerve and muscle: Nature, localization and dynamics
W. W. LAUTT — Afferent and efferent neural roles in liver function

VOLUME 22

W. WILCZYNSKI and R. R. CAPRANICA — The auditory system of anuran amphibians
H.-R. FRISCHKNECHT — Effects of cannabis drugs on social behaviour of laboratory rodents
C. WINDER and I. KITCHEN — Lead neurotoxicity: A review of the biochemical, neurochemical and drug induced behavioural evidence
G. VIANI DI PRISCO — Hebb synaptic plasticity
W. H. ROSTENE — Neurobiological and neuroendocrine functions of the vasoactive intestinal peptide (VIP)
G. BUZSAKI — Feed-forward inhibition in the hippocampal formation
A. C. PAISLEY and A. J. S. SUMMERLEE — Relationships between behavioural states and activity of the cerebral cortex
T. PHILIP HICKS — The history and development of microiontophoresis in experimental neurobiology
R. P. VERTES — Brainstem control of the events of REM sleep
J. C. DE LA TORRE — Spinal cord injury models
I. KITCHEN — The rise and fall of endogenous opioid nomenclature

VOLUME 23

K. L. LEENDERS, J. M. GIBBS, R. S. J. FRACKOWIAK, A. A. LAMMERTSMA and T. JONES — Positron emission tomography of the brain: new possibilities for the investigation of human cerebral pathophysiology
L. ELFMAN — Immunisation with *Torpedo* acetylcholine receptor
U.-J. P. ZIMMERMAN and W. W. SCHLAEPFER — Calcium-activated neutral protease (CANP) in brain and other tissues
K. S.-ROZSA — The pharmacology of molluscan neurons
M. PALKOVITS — Distribution of neuropeptides in the central nervous system: a review of biochemical mapping studies

J. J. FEIGENBAUM and J. YANAI — Normal and abnormal determinants of dopamine and receptor ontogeny in the central nervous system
D. LEHMANN and W. SKRANDIES — Spatial analysis of evoked potentials in man—a review
M.-C. CALVET and J. CALVET — Computer assisted analysis of HRP labelled and golgi stained purkinje neurons
T. YAMAMOTO — Taste responses of cortical neurons
T. V. GETCHELL, F. MARGOLIS and M. L. GETCHELL — Perireceptor and receptor events in vertebrate olfaction

VOLUME 24

J. O. PICKLES and M. A. SIMMONS — Recent advances in cochlear physiology
M. B. ROSENBERG, C. HANSEN JR and X. O. BREAKEFIELD — The complexity and diversity of synaptic transmission in the prevertebral sympathetic ganglia
J.-C. DAVID and J.-F. COULON — Molecular genetic approaches to neurologic and psychiatric diseases
A. KIDMAN — Octopamine in invertebrates and vertebrates: a review
G. AUDESIRK — Neurochemical and cognitive aspects of depression
R. HARI and E. KAUKORANTA — Effects of lead exposure on the physiology of neurons
D. YAMAMOTO — Neuromagnetic studies of somatosensory system: principles and examples
G. TREDICI, L. TORRI TARELLI, G. GAVALETTI and P. MARMIROLLI — The operation of the sodium channel in nerve and muscle
Ultrastructural organization of lamina VI of the spinal cord of the cat

VOLUME 25

D. H. YORK — Somatosensory evoked potentials in man: Differentiation of spinal pathways responsible for conduction from the forelimb vs hindlimb
P. CANCALON — Influence of temperature on various mechanisms associated with neuronal growth and nerve regeneration
H. BRAAK and E. BRAAK — Golgi preparations as a tool in neuropathology with particular reference to investigations of the human telencephalic cortex
Z. ELAZAR and A. HOBSON — Neuronal excitability control in health and disease: A neurophysiological comparison of REM sleep and epilepsy
H. J. MARKOWITSCH and M. PRITZEL — The neuropathology of amnesia
G. SCALABRINO, M. E. FERIOLI and G. LUCCARELLI — Polyamine biosynthesis in primary tumors of human central nervous system: Review of current knowledge
M. M. SALPETER and R. H. LORING — Nicotinic acetylcholine receptors in vertebrate muscle: Properties, distribution and neural control
M. J. DASCOMBE — The pharmacology of fever

VOLUME 26

B. H. BLAND — The physiology and pharmacology of hippocampal formation theta rhythms
Y. DUNANT — On the mechanism of acetylcholine release
J. B. WILLIS — The modelling of neural circuitry
P. G. GREEN and I. KITCHEN — Antinociception opioids and the cholinergic system
A. J. S. SUMMERLEE — The neural control of luteinizing hormone release
J. A. RIBEIRO and A. M. SEBASTIAO — Adenosine receptors and calcium: Basis for proposing a third (A_3) adenosine receptor
P. KASA — The cholinergic systems in brain and spinal cord
D. M. ARMSTRONG — Supraspinal contributions to the initiation and control of locomotion in the cat

VOLUME 27

D. C. MCINTYRE and R. J. RACINE — Kindling mechanisms: current progress on an experimental epilepsy model
N. E. ROWLAND and J. CARLTON — Neurobiology of an anorectic drug: fenfluramine
J. EPELBAUM — Somatostatin in the central nervous system: physiology and pathological modifications
S. LONG and J. DUFFIN — The neuronal determinants of respiratory rhythm
B. L. JACOBS — Single unit activity of locus coeruleus neurons in behaving animals
S. F. TAKAGI — Studies on the olfactory nervous system of the old world monkey
A. WERNIG and A. A. HERRERA — Sprouting and remodelling at the nerve–muscle junction
T. R. SCOTT and G. P. MARK — Feeding and taste
A. SOLLEVI — Cardiovascular effects of adenosine in man; possible clinical implications

H. JAHNSEN — Responses of neurons in isolated preparations of the mammalian central nervous system

VOLUME 28

P. G. M. LUITEN, G. J. TER HORST and A. B. STEFFENS — The hypothalamus, intrinsic corrections and outflow pathways to the endocrine system in relation to the control of feeding and metabolism

S. C. MASSEY and D. A. REDBURN — Transmitter circuits in the vertebrate retina

R. W. RUSSELL and D. H. OVERSTREET — Mechanisms underlying sensitivity to organophosphorus anticholinesterase compounds

M. K. LEUNG and G. B. STEFANO — Comparative neurobiology of opioids in invertebrates with special attention to senescent alterations

S. MORI — Integration of posture and locomotion in acute decerebrate cats and in awake, freely moving cats

M. L. MAYER and G. L. WESTBROOK — The physiology of excitatory amino acids in the vertebrate central nervous system

F. ROSSI-FANELLI, A. CASCINO, R. STROM, P. CARDELLI-CANGIANO, F. CECI, M. MUSCARITOLI and C. CANGIANO — Amino acids and hepatic encephalopathy

E. RECHTHAND and S. I. RAPOPORT — Regulation of the microenvironment of peripheral nerve: Role of the blood–nerve barrier

M. SCHIEPPATI — The Hoffmann reflex: A means of assessing spinal reflex excitability and its descending control in man
